Sample Resume

[Your Name]

[Your Email] | [Your Phone Number] | [Your LinkedIn Profile] | [Your GitHub Profile] | [Your Location]

Summary

Results-driven **Software Developer** with **[X] years** of experience in **Java, Python, React.js, and REST API development**. Adept at designing scalable web applications, building RESTful services, and working in **Agile environments** to deliver high-quality software solutions. Passionate about writing clean, efficient, and maintainable code while collaborating with cross-functional teams to meet business objectives.

Skills

Programming Languages & Technologies

- **Java** (Spring Boot, Hibernate, Maven)
- **Python** (Django, Flask, FastAPI)
- **JavaScript & Frontend** (React.js, Redux, TypeScript, HTML, CSS)
- **Backend Development** (RESTful APIs, GraphQL, Microservices)
- **Database Management** (MySQL, PostgreSQL, MongoDB)

Development Practices & Tools

- **Agile & DevOps** (Scrum, Kanban, CI/CD, Docker, Kubernetes)
- **Version Control** (Git, GitHub, GitLab, Bitbucket)
- **Testing & Debugging** (JUnit, PyTest, Jest, Postman)
- **Cloud & Deployment** (AWS, Google Cloud, Azure)

Professional Experience

Software Developer

[Company Name] – [Location] | [Start Date] – Present

- Developed and maintained **RESTful APIs** using **Spring Boot and Django**, ensuring high performance and scalability.
- Built dynamic and responsive front-end applications using **React.js** and state management with **Redux**.
- Integrated **microservices architecture** for enhanced modularity and maintainability.

- Worked in an **Agile/Scrum** environment, collaborating with cross-functional teams to plan sprints and deliver projects on time.
- Designed and optimized database schemas in **PostgreSQL and MongoDB** to improve application performance.
- Implemented **unit and integration testing** using **JUnit, Jest, and PyTest**, reducing production bugs by 30%.
- Leveraged **Docker and Kubernetes** for containerized deployment and orchestrated services across multiple environments.

Software Engineer Intern

[Company Name] – [Location] | [Start Date] – [End Date]

- Assisted in developing a **React.js** web application that improved customer engagement.
- Designed and documented RESTful APIs, optimizing response times by **20%**.
- Participated in **Agile development cycles**, contributing to daily stand-ups and sprint planning.
- Conducted API testing using **Postman**, identifying and resolving performance bottlenecks.

Projects

Project Name - Scalable REST API Service

- Built a **Spring Boot-based REST API** for an **e-commerce application**, supporting **JWT authentication** and **role-based access control**.
- Used **PostgreSQL** for data storage and implemented caching with **Redis** to optimize performance.
- Deployed the application using **Docker, Kubernetes, and AWS Lambda**.

Project Name - Interactive Web Application with React.js

- Developed a **React.js** dashboard for data visualization, integrating **REST APIs** for real-time updates.
- Used **Redux for state management** and implemented **server-side rendering (SSR) with Next.js**.
- Implemented secure authentication using **OAuth 2.0 and JWT tokens**.

Education

Bachelor's Degree in Computer Science
[Your University Name], [Location] | [Graduation Year]

Certifications

- **Certified Java Developer (Oracle)**
- **AWS Certified Developer – Associate**
- **Scrum Master Certified (CSM)**

Additional Information

- Active contributor to **open-source projects** on GitHub.
- Regular participant in **hackathons and coding challenges** on platforms like LeetCode and HackerRank.
- Strong problem-solving and communication skills, with a passion for continuous learning.
